

BrowLift Discharge Instructions

Diet: Start with regular diet high in protein and low in sodium as tolerated.

Medications:

- Take all medication as directed. Please refer to your medication sheet provided by Dr. Criswell.
- Use pain medication as needed for pain and discomfort. **DO NOT DRIVE WHILE TAKING PRESCRIPTION PAIN MEDICATION.**
- You can use Ibuprofen (Motrin, Advil) 800 mg 3 times a day, as needed for discomfort, **starting 24 hours after surgery.**
- Take your antibiotics, **as prescribed**, starting the day of surgery.

Activity/Wound Care:

- Keep back elevated on 2-3 pillows or in a recliner for the first 5-7 days. This is to help decrease swelling and for comfort. **Do not lay flat.**
- After 24 hours you may shower. Use tepid water only when showering. Make sure you have someone with you the first time you shower in case you start to feel light-headed.
- Apply icepack to eyes for 15 minutes every hour for the first 24-48 hours.
- On external incisions, use ophthalmic ointment to incisions 2 times a day for 7 days, then stop.
- If laser resurfacing performed, apply Bacitracin ointment to treated areas for 4-5 days, twice a day.
- No lifting heavier than 10 pounds or increasing heart rate for at least 3 weeks after surgery. No exercise until cleared by Dr. Criswell.

Post-op Visits:

- Post-op visits are very important. Follow up with scheduled appointment. If you were not given a follow-up appointment, please call the office within 24 hours of your procedure to arrange an appointment.
- Then you will be seen again as follows: 1 day, 1 week, 3 weeks, 3 months, 6 months, and 1 year out from surgery.

Additional Discharge Instructions:

- Do not drive, operate mechanical equipment, or make important decisions for at least 24 hours after your surgery.
